

NE645/646

Dolby Noise Reduction Circuit

Product Specification

DESCRIPTION

The NE645/646 is a monolithic audio noise reduction circuit designed as a direct replacement device for the NE645B/NE646B in Dolby® B-Type noise reduction systems. The NE645/646 is used to reduce the level of background noise introduced during recording and playback of audio signals on magnetic tape, and to improve the noise level in FM broadcast reception. This circuit is available only to licensees of Dolby Laboratories Licensing Corporation, San Francisco, California.

NOTE:

*T.M. Dolby Laboratories Licensing Corporation.

FEATURES

- Accurate record mode frequency response
- Excellent frequency response tracking with temperature and $V_{CC} \pm 0.4$ dB typical
- Excellent back-to-back dynamic response — DC shift less than 20mV typical
- Improved stability of all op amps
- High reliability packaging

APPLICATIONS

- Tape decks
- Dolby surround sound system

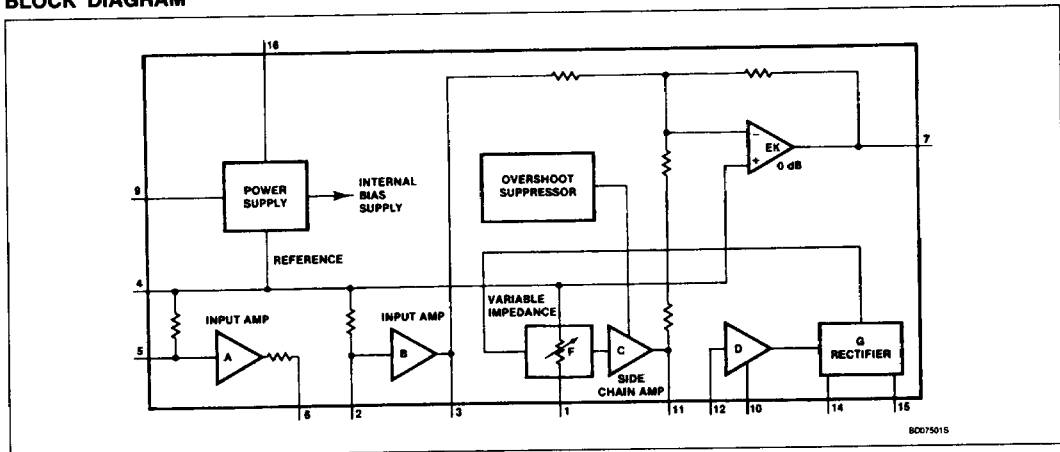

PIN CONFIGURATION

ORDERING INFORMATION

DESCRIPTION	TEMPERATURE RANGE	ORDER CODE
16-Pin Plastic DIP	0 to +70°C	NE645N
16-Pin Plastic DIP	0 to +70°C	NE646N

NE645/646

TYPICAL PERFORMANCE CHARACTERISTICS

APPLICATION INFORMATION

The NE645/646 is a direct replacement for the NE645B/646B. The NE645/646 incorpo-

rates improved design techniques to insure excellent performance required in Dolby B and C Type Audio Noise Reduction Systems. Critical component values are unchanged

except for C309 on Pin 1 which is now an optional component in specific applications defined by Dolby Laboratories. All circuit parameters are guaranteed at 12V V_{CC} .

14.0	0.5	0.8	1.1	1.8	2.7	4.4	6.5	8.7	10.3
20.0	0.7	0.7	1.2	1.9	2.7	4.4	6.5	8.7	10.3

NOTE:

The figures given in this table are the average response of many of Dolby Laboratories' professional encoders, and are not intended to be taken as required consumer equipment performance characteristics. Thus, no inference should be drawn on the tolerances which licensees must retain in consumer equipment. The figures can, however, be used to plot typical characteristics.
